

OpenOrienteering Mapper

- Development on OO Mapper started in late 2011 as one-man-project, now it contains contributions by more than **10 people**. New contributors are always welcome!
- Three alpha versions have been released so far, the latest on **July 6th**.
- This version contains **all basic tools** needed for mapmaking, however many convenience functions are missing
 - Before using it, check if all functions you need are already there
- **Highlights:**
 - .ocd (version 8) import and export
 - Accurate **live preview** for editing actions
 - Platform independence: runs on Windows and Linux; Mac OS X with some effort
- **More information:**
 - ICOM presentation: <http://orienteering.org/resources/mapping/>
 - Website: http://oorienteering.sourceforge.net/?page_id=103
